

Imagine the life you want to live and live the life you imagine

Climb **step by step**, and soon you will be at the **top** of the ladder.

Every action you have taken in your life has been as a result of the thought processes going on in your mind. Your thoughts create your reality. What you think about, you consciously or subconsciously create in your life. If you are consciously aware and shape the thoughts that run through your mind, you will ultimately control the decisions that you make in your life.

Life itself is a continuous process. This means living the life you imagine would be a continuous creation of your own imaginations. You might not control all the actions that come into your life, but you control your reactions to those actions. This control comes from the power of thoughts - the ability to control thoughts that create reactions to life.

Your mind is one of your powerful tools. Be conscious of what you put into it. Climb the steps of life using the imaginative power of your thoughts. Imagine your ideal life right now and watch the world gradually change to what you imagine it to be!
